### Description

Irregular patterned iron lattice set of 2 side tables with white marble tops.- Indulge your interior with the contemporary glamour of the Houseology Collection Templar Abstract Iron Set Of 2 Side Tables White Marble Gold Finish.

These eclectic designer side tables are sold as a set of 2 and are notable for their irregular patterns and warm golden finish.

Each Templar side table is crafted by hand, a process that gives it its own unique characteristics - this becomes apparent when inspecting the serpentine configurations of their sides and the distressed finish that textures the gold colour.

One of the tables follows a simple cylindrical design, the other swelling out slightly at the sides.

Both feature round tops made from natural white marble with a unique veined appearance every time.

Group together to transform lost corners of the home or scatter in the lounge to provide handy additional table surfaces when enjoying after-dinner drinks with friends.

This set of designer side tables are handcrafted so please expect slight variations to the finish.

Net product weight: 10kg
